

Function Development

Graham Widmann

Wireframe Storyboard

Splash Screen

This will be what appears when the device is first plugged in and receives power.

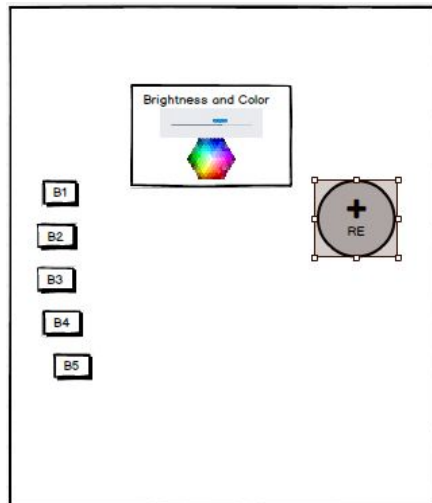

Home Screen

Right after the splash screen this screen will appear. It will allow the user to get right into using the device and its applications. Top left is the size of the brush and bottom right is the hardness of the brush. These will vary depending on the tool being used.

Function screen 1

This will appear as the menu screen and will allow the user to customize options of the device and its appearance.

Function screen 2

The appearance screen will allow the user to pick a variety of colors for the backlights and the brightness of the device depending on the environment around them.

Function screen 3

The Tool Customization screen will allow the user to customize what controls are being set to each button.

Help Screen

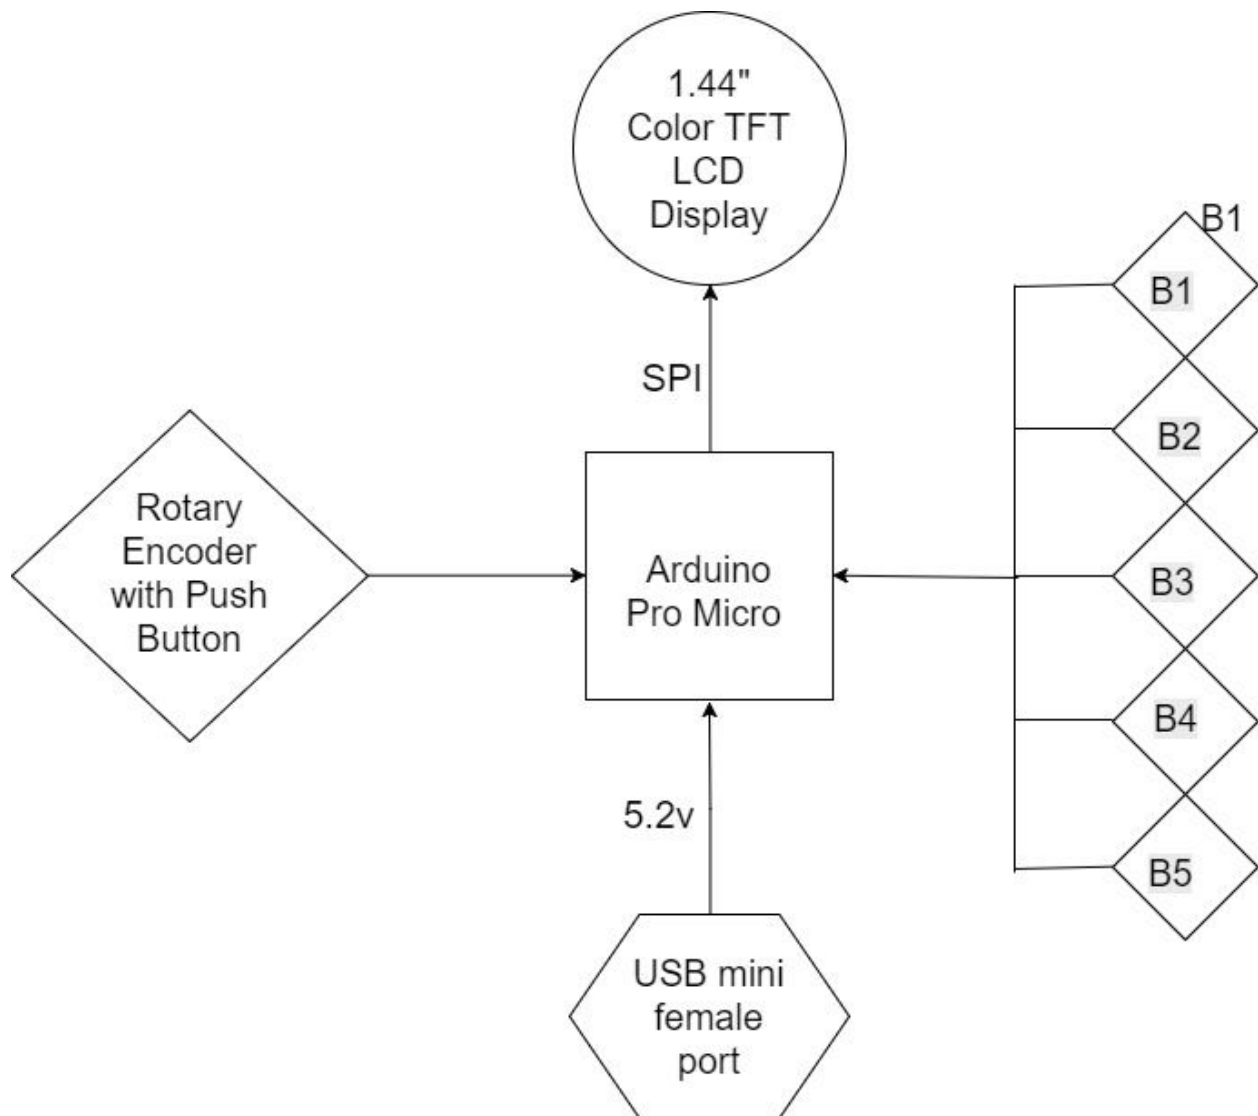

This will give information about the device and how to operate it.

About screen

The about screen will have information about the device and how it operates. It will also have information on the designer.
